TIME IS CALLED

Chief Consolidated Company Sets Last Day When Stock Will Be Exchanged.

MAY 16 IS DAY DETERMINED UPON

Tintic Deal Being Rounded Out by Giving All Plenty of

Aubrey Flich, secretary of the Eureka City Mining company of Eureka, has forwarded to stockholders a notification that the directors of the Chief Consolidated company, at a meeting held April 14, determined that the offer to the Eureka City stockholders for a consolidation will held open until noon of May 16. All Eureka City company stockholders are informed that if the offer is accepted they must notify William Seager, secretary of the Chief Consolidated Houghton, Mich., by the date specified. The offer of the Chief Consolidated

company is to give one share of its stock for each five shares of Eureka City, and the proposition was opened for the latter organization several weeks ago. The two

PUBLIC REFUSES TO GET INTO THE GAME

James A. Pollock & Co., bankers and brokers, furnish the following, received over their private wire yesterday after-

over their private wire yesterday afterneon:
Logan & Bryan Stock Letter, New York—
Aggressive operations for the decline were
again conducted, with the result that a
volume of long stock was dislodged. But a
disposition to cover thort contracts became
general in the last hour and recoveries
from the low levels were recorded. The
heavy selling of Steel, which has been in
progress for the past few sessions, has
fostered a suspicion that the issue is not
likely to be raised to a 5 per cent regular basis next week. In addition, the
development in the mercantile world today gave rise to rumors that conditions
were not entirely as satisfactory as appears on the surface. Generally speakling, sentiment in commercial and financial circles are mixed, in view of the
agitation and investigations of nearly
every character which are being conducted at this time, and it therefore does not
seem surprising that the investing public eem surprising that the investing public annot be induced to take hold of attrac-

cannot be induced to take hold of attractive issues.

Paine Webber & Co. Letter. Boston—
North Butte opened strong, but the new buying which came in yesterday seemed to be over, and scattered seiling broke the price down to 234, with a subsequent rally to 344. The whole market showed no tendency either way. The transactions were very small and commission house business was light. The selling by the bears in Steel and Amalgamated unsettled the whole list and there is nothing in sight at present to encourage buying. We look for a continued period of duliness until the political and industrial situation becomes more clear.

OHIO COPPER COMPANY NOT CLOSING PLANT Onto Cop Opposionate Plant

A report became current yesterday afternoon to the effect that the Ohio Copper company had let a hundred employees at the Lark mill go, and that a cessation of mill activity was determined on until the officials had completed the financial plans in the east. Application at the local office of the company brought out a strong denial of this, it being stated that there were not a hundred men on the payrolls. It was also stated that the mill is not only running, but that it is doing the best work it has ever done, the management having adjusted the night of the experimental or raw condition, always the case with new plants.

ASKS SALT LAKE ABOUT JOHN D. RYAN West Ut. C. West Ut. C. West Ut. C. West Victoria ... West From the north Friday want-NORTH ASKS SALT LAKE

A message from the north Friday wanted to know if John D. Ryan was registered at any of the local hotels, but as far as can be ascertained. Mr. Ryan had as yet made no reservation here. This message comes closely on reports from the east that Mr. Ryan intended to come west for the purpose of inspecting the international Smelting plant, and to find out at first hand the condition of the Utah Consolidated property on which the leternational will depend for a big tennage of ore.

Ore and Bullion.

The ore and bullion report for Friday, given by McCornick & Co. was as follows: Ore received, \$145,000; bullion shipped, \$30,000; gold, \$5000; total, \$180,-

We Offer

our customers a stronghold of safety for their funds, as well as all the facilities of the thoroughly modern bank. Accounts, subject to check, are solicited.

DRIVING IN RIGHT LAST YEAR ZING DIRECTION FOR ORE

Superintendent Coffin Satisfied With Developments on the Lower Mammoth,

"The big ore body is still to the south us, in which direction the drift on the 2000 level is progressing at a goo The entire face is vein matter rate. and a part of the face is ore from which very good assays are being obtained onditions are ripe for very early deelopments.

This was the news given yesterday afternoon by E. C. Coffin, director and superintendent of the Lower Mammoth Mining company, when telephoned by The Tribune. He is satisfied with results, and that he is driving in right direction for the main shoot. Those who know the Tintic country predict that who know the Tintic country predict that the drift will develop one or possibly more ore shoots before the main body is gained, so they are reserving their judgment until work has not only struck an ore body, but has developed it in a substantial manner.

Mr. Coffin says that the 1800 level is developing in a fine manner, and while working through some low-grade rock above the 1800, he broke into an entirely new body of fine grade shipping lead ore. This ore has been followed for about four sets so far, and it looks very encouraging.

NO SPECIAL FEATURES IN FRIDAY'S TRADING

the proposition was opened for the latter organization several weeks ago. The two properties adjoin in the Tintic mining district, and when merged will round out a very desirable proposition. The Chief Consolidated company during the past year has not expended all its thought and time on development alone, although a splendid amount of work has been done, and to fine purpose, at each, but the officials have quietly proceeded to enlarge the company's holdings, until today it has	IN FRIDAY'S TRADING Stock values held rather well Friday on the local exchange, but it was evident that the public is waiting for additional news from various interesting points before jumping in with buying orders. During the day, 54,450 shares of stock sold, the market value being 13,591. The following were the closing unlisted and listed stock transactions:
one of the largest and most dearrance	UNLISTED STOCKS
groups in the Tintic camp. From the beginning, the Chief Consoli-	Bid. Asked Sold for.
dated determined on deep work, and the shaft of the old Little Chief company has afforded an economical and ready access to resources far below the surface. The developments in the Chief and also in the Eagle & Blue Bell, during the past few months have attracted attention anew to that part of the district, where are located such big propositions as the Centennial-Eureka, Germini, Eureka Hill, and others. The Chief company started out in life with a handsome cash development fund, and with the treasury generously provided with treasury stock for the acquisition of other properties, and it is likely that the Eureka City stockholders soon will have all their stock transferred for the new. Kansas.

The production of zinc ore in 1909 was the largest on record. Another noteworthy feature of the statistics for 1909 is that each state made an increased production, which was due partly to the high price of zinc ore and partly to the development of new districts, which would probably have added to their production without the special stimpulus that they received. This was the case with Butte, Miami (Okla.), Good Springs (Nev.) and probably Arizona. The larger production of New Mexico was due chiefly to the resumption of shipments from Magdalens. MEN OF SMELTERS WANT MORE WAGES

in Mining and Smelting Circles of Valley.

It developed on Friday that there is a strong undercorrent of unreat among the miners employed in Bingham and he smeltermen of the valley. As put a week or two ago by one operator, the inhers do not claim that their labor is worth so much more than they now ire drawing in wages, but that the pay hey get is worth less than it was a car or two years ago, owing to the norecased cost of living. There has been in demands made up to the present time, is far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is its far as can be ascertained, but it is an encouraging from two period from turn transmits to the stockhold that of the certified accountants. The president reviews at length the acquisition of the property of the Boston Consolidated, and says:

"Simultaneously with the conduct of the negotiations looking to the acquisition of the property of the Boston Consolidated, and Padang come."

ment has begun and may come to a bead at any day.

The Greeks at the Murray plant of the American Smelting and Refining company assert that their wages of from \$1.75 to \$1.90 a day are not sufficient, and if the increase asked for, which is supposed to be over 10 per cent, is not met by May 1, they will walk out. It is not likely that a strike will be declared, nor that any trouble will ensue, as the men claim they will simply guit and look for other work. How many of the 700 men employed by the company will take this action is not known at present.

It is likely that the demands of the men will await the arrival of General Manager C. 'W Whitley, who is ex-pected home (within the next day or two.

LATE REPORTS FROM THE LAKE PROPERTIES

New Jersey represent mine production. This ore, averaging about 20 per cent zine, is separated primarily into willemite and frankline. The former is used for the manufacture of spelter here and abroad. The latter is employed for the manufacture of zine oxide. As to the remainder of the production, the stallstics do not permit the division between blende and calamine, but it may be said with assurance that the major part is blende. "Copper" of Houghton, Mich., gives the latest developments in the various so-called Lake properties in which Salt Lakers are heavily interested. The Bohemia company is arranging to install as second diamond drill outfit. Hole No. I is making good progress, and if the geology is properly identified and the conditions are similar to those at the North Lake and Adventure, with which the geology in Bohemia's No. I drill so far have tailled aweurately, it is expected that this hole will reach the No. I Adventure lode during the next week or two.

The Indiana No. 5 drill hole is approaching 800 feet in depth, and the lode is not expected short of 900 feet, No. 6 drill is cutting through the same geology as No. 5, but about 800 feet farther south. It is two or three weeks behind the No. 5 in progress. Drill No. 4 continues to drive through unidentified ground. Drill work with the No. 3 outfit is to be resumed within a few days. Regarding the North Lake, "Copperer" says:

The item, "undivided profits," as shown

No. 1 Adventure lode during the next week or two.

The Indiana No. 5 drill hole is approaching 800 feet in depth, and the lode is not expected short of 900 feet. No. 6 drill is cutting through the same geology as No. 5, but about 800 feet farther south. It is two or three weeks behind the No. 5 in progress. Drill No. 1 continues to drive through unidentified ground. Drill work with the No. 3 outfit is to be resumed within a few days. Regarding the North Lake, "Copper" says:

"North Lake has taken out a good core showing a lode thirty-six feet wide, with five feet exceedingly rich. This core comes from No. 7 hole. The same lode in No. 8 hole showed some copper. It is 450 feet below where No. 1 Adventure lode was cut. The disclosure of a copper-bearing amygdaloid lode this week in North Lake's No. 7 diamond drill hole was not wholly unexpected, because it corresponds precisely with a copper-bearing amygdaloid cut in No. 2 hole. But it was somewhat unexpected that five feet of this lode sholdd yield a core as rich as it did.

worthy feature of the statistics for 1909
dist that each state made an increased production, which was due partly to the

Oil Strike in Texas.

Cit Strike in Texas.

EL PASO, Tex., April 22.—Oil was discovered in New Mexico, south of Alamogordo and eight miles north of El Paso, today. The country is wild with excitement and five thousand acres already have been filed upon. A well for artesian water was being sunk yeaterday when the drill became stuck at a depth of 1500 feet. When the drillers went back to work today they found water and oil ooking over the top of the casing.

United States Meeting

special to The Tribune. Special to The Tribune.

NEW YORK, April 22.—The annual meeting of the United States Reduction and Refining company was held at its offices in Jersey City today. The retiring officials and directors were re-elected, and after the transaction of routine business the meeting adjourned. The annual statement was not given out.

UTAH COPPER NOW

Considerable Unrest Reported Annual Report Is Evidence That Company Prospered During Last Year.

all the stock has been paid for in full by the stockholders, resulting in an addi-tional capital of \$3.571.850, which, since the close of the fiscal year, has been re-ceived by the company.

This additional capital

"This additional capital will be utilized in part for the enlargement of the mill acquired through the acquisition of the property of the Boston Consolidated com-pany to a capacity of at least 6000 tons per day and modeled after the Magna plants.

Mining Notes.

Frank Janney, mill manager of the tah Copper company, has returned from visit to Los Angeles. M. S. Duffield, the mining engineer, is back from Idaho, where he has extensive ranch interests.

E. J. Raddatz, general manager of the Standard company, has returned a visit to the property. C. W. Whitley, general manager of the American Smelting company, is ex-pected back from a two months' trip to the Orient on Monday.

Thomas Weir, the well known mining man, will return from a several months' stay in the Sandwich Islands on Mon-day.

country of Idaho.

Harry C. Beesen has returned from Jarbidgs, where he has mining interests. Mr. Beesen does not believe that the world should call Jarbidge a miling proposition exclusively until more development work has been done to establish the real merits of the district.

Vice-President E. L. Newhouse and Consulting Engineer Karl Eilers of the American Smelting and Refining company are in the city making one of their usual visits of inspection of the local plants of the company. They are en route west.

One Conductor Who Was Cured.

Mr. Wilford Adams is his name, and he writes about it .- "Some time ago I was confined to my bed with chronic rheumatism. I used two bottles of Foley's Kidney Remedy with good affect, and the third bottle put me on my feet, and I resumed work as conductor on the Lexington, Ky., street railway. It gave me more relief than any medicine I had ever used, and it will do all you claim in cases of rheu-matism." Foley's Kidney Remedy cures rheumatism by eliminating the uric acid from the blood. Schramm-Johnson. Drugs. Five stores.

CHICKEN

Roup! Roup! Use Dr. Nunn's Black Oil Compound on all chickens with roup. 3000 cured in Salt Lake and vicinity. Ask Mr. Charles Crane. Sol. at druggists, 50c and \$1 a bottle. nd \$1 a bottle.
